

# Testing Sprint Activities 2023

Mercedes me App (MyStar)

Exported on 02/09/2024

# Table of Contents

1 Sprint Test Strategy: .....4

# 1 Sprint Test Strategy:

1. Assign testing tasks among testing colleagues in each squad
2. Start to establish\prepare your testing environment
  - a. Book the vehicles needed to perform your testing via <https://wiki.swf.daimler.com/display/swf/5+Vehicle+reservation>, you can book the different NTGs depending on which Test you want to perform
  - b. Prepare and check the availability of the Test devices needed to perform your testing
    - i. iOS devices with different OS versions or screen sizes
    - ii. Android devices with different OS versions or screen sizes
    - iii. Watches if you need to perform your test in smartwatches
3. Start designing all the test scenarios which you need and add\link them to our Test repository for the specific epic for which you are designing the test
  - a. For Manual Testing, In Jira → click on Tests in the top toolbar → Then click on a Test repository then you will be able to see our test repo.

Test Repository for project MyStar App

		NEW MYSTAR-19566 Parking stations map screen detail

- b. Please check this link to know how to design the

Testcases [Xray/Jira Testing Knowledge Base](#)<sup>1</sup>

- c. For Automation Testing, You can follow our repo on Github via <https://git.daimler.com/RisingStars/e2e-mobile>
4. Make sure that all Test assets "Testcases" are shared with PO, Developers, and Designers
  - a. Sharing TCs will allow the other parties to cover all the areas and it will save the testing time at the end of the sprint
  - b. Doing sync and party with the developers\designers to make sure that all requirements have been covered and all the parties have the same understanding level
5. Start Test execution for your manual or for your automation Test cases and make sure that all bugs found during testing are logged in Jira and well informed to the other parties.
6. After fixing all bugs and we are sure that everyone is working as expected with no major or medium bugs so we can send all our testing tasks to be closed and move the story itself to sprint Review after communicating with PO
